

# Not Much of an Algorithm

Quant:

Desk: Jerry Han

Backtester:

Implementer:

## **Introduction:**

This algorithm isn't really meant to perform well. It is more meant as a template for creating other algorithms.

## **Inputs:**

- This variation of the algorithm only requires standard ticker:price data.
- The trends are then obtained within the algorithm itself, without needing more input.

## **Backtesting:**

Pending, but this algorithm will be terrible.
